

Belgian Mesh Cable Tray Unit Price

AI Overview

Unit prices for Belgian mesh cable trays vary depending on size, material, and supplier, typically requiring a direct quote from local distributors. Overview of Belgian Suppliers Trayco specializes in 100% Belgian cable trays, mesh trays, and cable ladders. They offer tailored solutions and project advice, making them a key source for customized orders. GroupSumi provides wire mesh trays made from galvanized or stainless steel, suitable for industrial, commercial, and residential installations. They offer a variety of sizes and modular designs. Delaby Electro supplies metal wire mesh cable trays designed for secure and organized cable routing, with quick installation and maintenance support. Factors Affecting Price Material: Galvanized steel is generally less expensive than stainless steel. Dimensions: Tray width, length, and height influence cost. Larger trays or custom sizes increase the price. Load Capacity: Trays designed for heavier cable loads may cost more due to reinforced construction. Accessories: Fasteners, bends, and junctions can add to the total unit cost. Customization: Tailor-made solutions or project-specific designs typically require a quote. How to Obtain Pricing Since unit prices are not publicly listed online, the most reliable approach is to contact suppliers directly for a quote. Most Belgian suppliers, including Trayco, GroupSumi, and Delaby Electro, provide consultation services to determine the correct tray type and size for your project. Recommendation For budgeting purposes, you can request sample quotes from multiple suppliers, specifying the tray material, dimensions, and any accessories needed. This ensures accurate pricing and allows comparison between Belgian manufacturers.
