

China Unicom relocation of optical cables

Overview

China Unicom Group, one of China's major telecommunications operators, has revealed plans for the construction of a nearly 3,000-kilometer-long submarine optical fiber cable, which will span from Hong Kong to Sihanoukville in southern Cambodia. Recently, a centralized procurement project of a provincial China Unicom company was announced to be terminated. It accelerates the construction of network infrastructure and actively plans computing power , enhanced the breadth and depth of mobile network coverage and user perception. Although the project was issued at the end of 2024, the bid will be opened in. Hengtong, in collaboration with China Unicom, has successfully deployed and begun operating China Unicom's first commercial hollow-core fiber optic cable line. This hollow-core fibre cable is now serving a dedicated line for a bank branch in Jiangsu, where it has been integrated into the live. Recently, the first new global carrier “Large Effective Area Fiber” (LEAF) (ITU-T standard code G.
