

Compatible Anti-Calling PoE Switches

AI Overview

For anti-calling or alarm system deployments in Finland, PoE switches with sufficient power, reliability, and optional battery backup are recommended, with suppliers like Swansons and Kjell & Company offering compatible Nordic options.

Recommended PoE Switch Features for Anti-Calling Systems

When selecting a PoE switch for alarm or anti-calling systems, consider the following:

- PoE Budget and Output:** Ensure each port can deliver at least 30W if powering IP phones, cameras, or alarm devices.
- Port Count:** Choose a switch with enough ports for all devices, typically 8–48 ports depending on system size.
- Battery Backup:** For uninterrupted operation during power outages, switches with integrated UPS or battery backup are ideal.
- Management Capabilities:** Managed switches allow remote monitoring, port cycling, and configuration, which is useful for security systems.
- Form Factor:** Rack-mount or wall-mount options depending on installation environment.

Nordic Supplier Options

Swansons Telemechanik offers PoE switches with built-in battery backup, supporting 30W per port and multiple port configurations (4–23 ports), suitable for both wall and rack installations. These switches include alarm outputs for network or battery failures, making them ideal for anti-calling systems.

Kjell & Company provides a range of PoE switches suitable for small to medium networks, ensuring stable data and power delivery to devices. While based in Sweden, they ship to Finland and offer Nordic support.

Aruba Instant On 1930 and similar enterprise-grade switches provide cloud management, intelligent power allocation, and compatibility with IP cameras, VoIP phones, and alarm systems, though they may need to be sourced through distributors in Finland.

Additional Considerations

- Compatibility:** Most standard PoE switches (IEEE 802.3af/at) are compatible with alarm and anti-calling devices.
- Redundancy:** For critical systems, consider switches with dual power inputs or external UPS integration.
- Local Support:** Choosing suppliers with Nordic presence...
