

How much does a flat steel cable tray cost in Saudi Arabia

AI Overview

Flat steel cable trays in Saudi Arabia typically cost between 100 SAR to 500 SAR per meter, depending on material, size, and finish. Price Range and Factors The cost of flat steel cable trays varies widely based on several factors: Material: Hot-dip galvanized steel, stainless steel (304 or 316L), or powder-coated steel affect the price, with stainless steel being more expensive due to corrosion resistance. Dimensions: Width, height, and thickness of the tray influence cost. Standard thicknesses range from 1.5 mm to 2 mm, and widths vary according to cable load requirements. Type and Profile: Solid-bottom, ventilated, or channel-type trays, as well as flat or box-shaped rungs, can change the price. Length: Standard lengths are 2.44 m, 3 m, or 3.66 m, with longer lengths generally costing more per unit. Accessories: Bends, tees, reducers, covers, and connectors add to the overall cost. For small-scale or light-duty trays, prices can start as low as 25–50 SAR per unit for surface-mounted cable trays, but industrial-grade flat steel trays for large projects typically range from 100 SAR to 500 SAR per meter. Supplier Guidance Hitech Fence and Wescosa supply industrial cable trays across Saudi Arabia and provide custom quotations based on project specifications. It is recommended to share your Bill of Materials (BOM) with suppliers to get accurate pricing, including finishes, accessories, and delivery options. For large projects like refineries, power plants, or commercial buildings, prices may vary further due to bulk orders, material grade, and installation requirements. Summary While small consumer trays are inexpensive, industrial flat steel cable trays in Saudi Arabia generally cost 100–500 SAR per meter, with the final price depending on material, size, finish, and accessories. Contacting local suppliers with your project details is the most reliable way to obtain an accurate quotation.
