

Price list for custom-made cable trays in Guatemala

AI Overview

Tray-type cable trays in Guatemala typically range from \$2 to \$25 per meter, depending on material, type, and supplier. Price Range and Factors The cost of tray-type cable trays varies widely based on material, type, size, and surface finish. Common materials include galvanized steel, stainless steel, aluminum, and fiberglass, each affecting the price differently. Galvanized steel is the most common and cost-effective, while stainless steel and aluminum are more expensive due to corrosion resistance and lightweight properties. Plastic or fiberglass trays are budget-friendly but less suitable for heavy loads. Perforated trays: Offer better airflow and cooling, typically slightly cheaper than ladder trays, and are widely used in industrial and commercial applications. Ladder trays: Stronger and suitable for heavy cable loads, generally at the higher end of the price range. Hot-dip galvanized trays: Common in Guatemala, providing durability against corrosion, with prices based on standard lengths (e.g., 2.4 meters) and fittings priced per piece. Estimated Costs Low-end: \$2-\$5 per meter for lightweight or plastic trays. Mid-range: \$10-\$15 per meter for standard galvanized steel perforated trays. High-end: \$20-\$25 per meter for stainless steel or heavy-duty ladder trays. Additional Considerations Bulk orders: Large projects may reduce per-meter costs. Shipping and installation: Costs vary depending on supplier location and labor rates in Guatemala. Supplier options: Companies like Brilltech Engineers and Jeetmull Jaichandlall (P) Ltd. provide high-quality trays with customization options, including size, shape, and material. For accurate pricing, it is recommended to contact local suppliers directly to request a quote based on your project specifications, including tray type, material, and quantity. This ensures compliance with local standards and optimal cost efficiency.
