

Wholesale price of energy-saving miniature optical splitter inserts

AI Overview

Wholesale miniature optical splitter inserts are available from \$2 to \$15 per unit depending on split ratio, type, and supplier, with bulk discounts for larger orders.

Overview Energy-saving miniature optical splitters, often using Planar Lightwave Circuit (PLC) technology, are designed for compact, efficient fiber optic networks such as FTTX, GPON, EPON, LAN/WAN, and CATV applications. These splitters distribute optical signals evenly across multiple output ports while maintaining low insertion loss, low polarization-dependent loss, and high uniformity. They are available in various split ratios including 1x2, 1x4, 1x8, 1x16, 1x32, and 1x64, with both single-mode and multi-mode options.

Supplier Options Alibaba and DHgate offer a wide range of miniature optical splitters at wholesale prices, often with customizable options for bulk orders. Made-in-China lists multiple manufacturers providing factory-priced optical splitters, allowing for cost-effective procurement and OEM/ODM customization. EFON Cable specializes in micro-tube PLC splitters, which are compact, easy to install, and suitable for high-density network deployments. Opelink provides high-quality mini blockless fiber PLC splitters with excellent uniformity and low insertion loss, suitable for EPON, GPON, and FTTH networks.

Pricing Considerations

- Split ratio:** Higher split ratios (e.g., 1x32, 1x64) generally cost more than lower ratios (1x2, 1x4).
- Module type:** Micro-tube or mini blockless designs may have slightly higher prices due to compactness and energy efficiency.
- Bulk orders:** Wholesale pricing improves significantly with larger quantities, often including discounts or free shipping for large-scale purchases.
- Customization:** OEM/ODM options, such as specific pigtail lengths, connector types (UPC/APC), or packaging, may affect the final price.

Typical Wholesale Price Range

- 1x2 to 1x8 splitters: Approx...
